

A New Horizon Project for AI Security, Trust and Risk Assessment in Machine Learning

Project's Objectives

Develop a security and risk assessment process for AI models across the supply chain lifecycle.

Create a Security, Trust, and Robustness (STR) Defence Framework for AI model security-by-design throughout its lifecycle.

Propose a new paradigm for AI model security compliant with EU AI guidelines, including an AI Model Bill of Materials as a universal description structure.

Objective 1:
Infuse context-aware mechanisms in AI models to adapt to changing cybersecurity environments.

Objective 3:
Build a secure, trusted AI supply chain ecosystem through the CoEvolution hub, offering secure AI models and datasets.

Objective 3:
Validate and demonstrate the CoEvolution solution in two complex pilots, covering all AI model paradigms.

Objective 7:
Develop a sustainable business plan for the CoEvolution solution post-project.

Pilots

Pilot 1:

Securing the AI Supply Chain of Manufacturing Infrastructure

Securing the AI Supply Chain in the Autonomous Vehicles Domain

Consortium

CoEvolution is a 3 year Project, coordinated by **Erevnitiko Panepistimiako Institouto Systimatou Epikoinonion Kai Ypologiston**, and composed of **15 partners from 8 countries**.

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Commission. Neither the European Union nor the granting authority can be held responsible for them.
